The Effects of Vitamin D on Balance in Parkinson's Disease

**PVAMC
IRB #
2393**

**OHSU
IRB #
6482**

What are the objectives?

Measure the effect of vitamin D on balance in Parkinson's disease.

Who can enroll?

Must have a diagnosis of Parkinson's disease (PD)

Must be between 50 and 75

Must be able to walk 50 feet by yourself

Must not have a history of renal stones

Must not be taking a vitamin D supplement

How much will it cost?

There is no cost to participate in this study. This is a research study and not part of treatment or diagnosis of Parkinson's disease. You will not benefit by participating in this study but you may learn more about your disease.

Will I be compensated?

You will be paid \$10.00 for each completed visit for a total of \$60.00 for all visits.

What will I do?

One Screening Visit (2 hours), Four Visits each 4 weeks apart (30 minutes), One Final Visit (2 hours), take a study drug for 16 weeks

How long will the study last?

The study lasts 16 weeks with an additional 8 weeks of follow-up.

How do I enroll?
