Description: The purpose of this web-based discussion is to provide VHA clinicians with information about the onset of pain in Parkinson's disease and how it may be treated. This course is designed to provide VHA healthcare providers with an insight into pain in patients with Parkinson's disease.

Outcome Objectives: After the conclusion of this educational program, learners will be able to:

1. Understand the prevalence of pain in PD.
2. Describe how it might present, precede onset of PD symptoms.
3. Describe proposed pathophysiology for pain in PD.
4. Understand the approach and treatment of pain in patients with PD
